**RE: Potter Valley Hydroelectric Project, FERC No. 77-CA
Late Fall Irrigation Request Notification**

Dear Secretary Reese:

This letter presents a notification of a contract water delivery request from Potter Valley Irrigation District (PVID), for late fall irrigation (October 16-31) which is included in Pacific Gas and Electric Company's (PG&E) Potter Valley Hydroelectric Project, Federal Energy Regulatory Commission (FERC) No. 77 (Project).

In an order dated October 14, 2009, FERC approved an amendment to the Project license allowing for frost protection and late fall irrigation contract water deliveries. The order requires that PG&E notify the National Marine Fisheries Service, United States Fish and Wildlife Service, California Department of Fish and Wildlife, Round Valley Indian Tribes (collectively: Agencies), and FERC prior to granting late fall irrigation or spring frost water deliveries to PVID. On October 14, 2026, following a request from PVID for late fall irrigation deliveries, PG&E sent an email notifying the Agencies of the deliveries. The record of agency notification is included as Enclosure 1. Additionally, late fall irrigation was discussed during the October 14, 2026, Drought Working Group meeting.

Should you have questions or comments regarding this matter, please contact Chadwick McCready, Senior License Coordinator for PG&E, at (530) 685-5710.

Sincerely,

Chadwick McCready
Senior License Coordinator
