

Declaration #22-01

of the

Mendocino County Russian River Flood Control & Water Conservation Improvement District

Declaring

Stage III: Water Warning

Pursuant to California Water Code Section 350

WHEREAS:

1. The Mendocino County Russian River Flood Control & Water Conservation Improvement District (District) holds the right to 7,940 acre-feet of Project Water stored in Lake Mendocino.
2. On April 21, 2021 the California Governor issued a proclamation that a state of emergency exists in Mendocino and Sonoma Counties due to severe drought conditions in the Russian River Watershed. Additional proclamations were issued on May 10, July 8, and October 19, 2021, expanding to statewide and directed state agencies to take immediate action to preserve critical water supplies and mitigate the effects of drought and ensure the protection of health, safety, and the environment.
3. On March 28, 2022 the California Governor issued [Executive Order No. 7-22](#), meant to provide guidance on emergency drought relief. The executive order (EO) states that the “21st century to date has been characterized by record warmth and predominantly dry conditions, and the 2021 meteorological summer in California and the rest of the western United States was the hottest on record” and “the ongoing drought will have significant, immediate impacts on communities with vulnerable water supplies, farms that rely on irrigation to grow food and fiber, and fish and wildlife that rely on stream flows and cool water.”
4. In July 2021, the California Governor called on Californians to voluntarily reduce their water use by 15%. At the end of March 2022 after the state failed to meet its 15% goal, the Governor issued an Executive Order calling on local water agencies to escalate their response to the ongoing drought.
5. The State Water Resources Control Board approved two [Water Conservation Emergency Regulations](#) effective January 18, 2022 and June 10, 2022 including a statewide ban on watering of non-functional turf in the commercial, industrial and institutional sectors as well as regulations requiring local agencies to implement water use restrictions amid the possibility that water supplies may be up to 20% lower due to extreme weather.
6. As of September 5, 2022 the water supply in Lake Mendocino is 44,504 acre-feet, which is 63% of the target water supply curve.
7. In accordance with provisions in the [Order](#) approving the 2022 Sonoma County Water Agency (Sonoma Water) Temporary Urgency Change Petition of June 2022, minimum flow requirements for the Upper Russian River are 25 cubic feet per second which is approximately 1,500 acre-feet per month.

8. Precipitation in the Upper Russian River has been below normal for three years and is currently 55% of average.
9. The Board of Trustees (Board) has found and determined that the ordinary demands and requirements of water consumers cannot be satisfied without depleting the water supply of the distributor to the extent that there may be insufficient water for human consumption, sanitation, and fire protection while meeting a reasonable carryover in the reservoir.
10. In accordance with Judgement No. 42059 issued by the Superior Court for the County of Mendocino, the District may notify Redwood Valley County Water District in writing of the unavailability of surplus water.
11. The Board has been working cooperatively with its customers, the State Water Resources Control Board (Water Board), Sonoma Water Agency, the Russian River Drought Response Group, and others.
12. Given the severity of the water shortage in the Russian River, it is essential that the priority of water rights in the Russian River watershed be enforced to protect and preserve the water supply available to the District and its customers.
13. The District is enrolled in the 2022 [Upper Russian River Water Sharing Program](#), a locally driven approach for addressing water shortages through demand management that provides an alternative to curtailment of water diversion and use. The Program is currently suspended due to insufficient water supply.
14. The Board held a public hearing on September 12, 2022 at which its customers had an opportunity to be heard and comment on the declaration and to present their respective needs.
15. Notice of the time and place of the hearing was published pursuant to Section 6061 of the Government Code at least seven days prior to the date of hearing in a newspaper printed, published, and circulated within the area in which the water supply is distributed.
16. The Board heard and fully considered all verbal and written public comment including the General Manager's report and recommendations at the Regular Board Meeting on September 12, 2022, as well as all testimony and comments submitted during the public hearing held at that Board Meeting.

NOW, THEREFORE, the District Board hereby declares as follows:

- Under current and forecasted conditions, the District's supply and/or distribution system will not be able to meet all water demands of its Customers through direct diversion due to reduced surface water availability in the Upper Russian River. Project Water previously stored in Lake Mendocino will be required to meet customer demand for 2022 water use.
- In an effort to extend current supplies of water and minimize the effects of the current and possible future water supply shortage, the Board is calling for:

1. Public agency and retail water supply customers to implement drought contingency and other measures as outlined in the California Governor's Executive Order No. 7-22 and the State Water Board's two Water Conservation Emergency Regulations and be prepared to prioritize diversions for public health and safety and fire suppression; and
 2. All District customers to take immediate action in complying with the California Governor's call for a voluntary 15% demand reduction, utilizing the resources available at www.SaveOurWater.com and www.SavingWaterPartnership.org.
- All water available to the District in 2022 under its water right has been, or will be, under contract to customers for beneficial use on lands situated within the District place of use and such amount will be insufficient to meet all requested District water demands; therefore, the Board declares no surplus water, defined by Judgement No. 42059 as that portion of the District's water right not put to beneficial use within lands situated in the District, is available for purchase by Redwood Valley County Water District.
 - The District will work with its customers and others in the watershed, including Redwood Valley County Water District, in an attempt to secure public health and safety supplies.
 - The District will work with the Water Board and others to ensure that water right priorities are respected in order to protect the surface water supply available to the customers of the District.
 - The Board hereby adopts a moratorium on applications for new water supply contracts, other than change of ownership, including increased contract quantities to existing Uniform Water Supply & Purchase Agreements, until the Board determines water supply conditions have improved sufficiently.
 - The Board hereby adopts a moratorium on water transfer amendments to Uniform Water Sale and Purchase Agreements other than those making water available for emergency water supply agreements.
 - A Russian River watershed-wide approach to the water supply shortage, drought condition response, and water system stewardship is needed through coordination with all water users in the Upper Russian River watershed.
 - The Board acknowledges that this Declaration and future regulations and restrictions on delivery and consumption of water may conflict with the provisions of its Uniform Water Sale & Purchase Agreement; however, pursuant to California law, this Declaration and any regulations and restrictions adopted pursuant to California law shall prevail over the provisions of the Uniform Water Supply Contract for the duration of the period of emergency.
 - The Board will continue to monitor and maximize water availability but recognizes that water supply conditions will continue to change and intends to be agile in its approach and response to changed conditions.
 - This Declaration supersedes all prior drought declarations by the Board.

District Staff is directed to:

- a. Communicate to all District customers the Board's updated declaration, warning of water supply conditions and the need for increased conservation measures.
- b. Continue to work with customers, Sonoma Water, and the Water Board to determine and update water availability, accommodate changes in water availability, and communicate changes with District customers in a timely manner.
- c. Continue providing the Board and customers with updates on the drought conditions, reservoir storage levels, and any anticipated changes through a weekly Water Supply Conditions email and other outreach.
- d. Continue public outreach to emphasize the reduced surface water and storage supplies necessitating significant reduction in water consumption by utilizing local and social media, public comment and presentations at regional entity meetings, the District's website, correspondence, etc.
- e. Continue Russian River watershed-wide coordination to address the water supply shortage, drought condition responses, and water system stewardship through the development of the Russian River Water Users Forum.
- f. Closely monitor the water supply conditions to determine if further action is needed.

The Board thanks District customers and the public for their anticipated cooperation and fully understands that it will take all residents and water leaders in the Russian River watershed to successfully navigate this situation.

ADOPTED 3rd day of October, 2022 by the Board of Trustees of the Mendocino County Russian River Flood Control & Water Conservation Improvement District, by the following vote:

Christopher Watt, President	<input checked="" type="checkbox"/> Yes / No / Abstain / Absent
Alfred White, Vice President	<input checked="" type="checkbox"/> Yes / No / Abstain / Absent
Matthew Froneberger, Treasurer	<input checked="" type="checkbox"/> Yes / No / Abstain / Absent
Tyler Rodrigue, Trustee	<input checked="" type="checkbox"/> Yes / No / Abstain / Absent
