policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. Deadline for filing comments, motions to intervene, and protests: April 1, 2024.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

1. Description of Request: The licensee requests a temporary variance of its minimum flow requirements at two project locations. Due to seismic risk at Scott Dam, the licensee has elected to leave the spillway gates at Scott Dam open indefinitely, thereby reducing the storage capacity in Lake Pillsbury by approximately 20,000 acre-feet. The licensee also states that there is a high potential for bank sloughing and ensuing dam safety and operational constraints should the reservoir recede to a pool level of between 5,000 and 12,000 acre-feet.

To preserve water storage in Lake Pillsbury and conserve cold water for downstream aquatic resources, the licensee proposes to release flows below Scott Dam (as measured at gage E-2) to be consistent with a critical water year type minimum flow of 20 cubic feet per second (cfs). However, actual releases would be closer to the minimum facility limitation of 35 cfs from the low-level outlet. In addition, the licensee would reduce minimum flows in the East Branch Russian River (as measured at gage E-16) to match the dry water year minimum flow requirement of 25 cfs with the flexibility to further

reduce flows to the critical water year requirement of 5 cfs, depending on water availability, safety concerns, and water temperature conditions in the Eel River. After September 16, 2024, the licensee would resume the dry water year flow release of 25 cfs. In addition, the licensee requests that compliance with the minimum flow requirement in the Eel River below Cape Horn Dam (as measured at gage E-11) be modified to a 24-hour average instead of an instantaneous requirement to allow for a tighter compliance buffer.

The request licensee's request also includes provisions for water temperature and biological monitoring, environmental mitigation, and monthly consultation throughout implementation of the proposed variance. The licensee requests that the variance begin immediately upon Commission approval and conclude when Lake Pillsbury storage exceeds 36,000 acre-feet following October 1, 2024, or is superseded by another variance or license amendment.
