Re: Potter Valley Powerhouse Transformer Outage and Replacement Update

Dear Mr. Cruzen:

This is in response to a letter dated March 22, 2023 from Ms. Janet Walther regarding the transformer outage at the Potter Valley Powerhouse, which is part of the Potter Valley Project, FERC No. 77. We have reviewed the submittal, and we note that the transformer will not be replaced, and the powerhouse will remain in non-operational status. We remind you that you must continue to satisfy the environmental requirements of the license.

We appreciate your cooperation in this aspect of our dam safety program. If you have any questions, please contact Mr. Ryan Tom at (415) 369-3347.

Sincerely,

Frank L. Blackett, P.E.
Regional Engineer
